DEPARTMENT OF ECOLOGY

Record of Decision

Applicant: Isaak Land Inc.

Application Number: 2283-A

This record of decision was made by a majority of the Board at an open public meeting of the Grant County Water Conservancy Board held on November 27, 2013. The undersigned board commissioners certify that they each understand the board is responsible "to ensure that all relevant issues identified during its evaluation of the application, or which are raised by any commenting party during the board's evaluation process, are thoroughly evaluated and discussed in the board's deliberations. These discussions must be fully documented in the report of examination." [WAC 173-153-130(5)] The undersigned therefore, certifies that each commissioner, having reviewed the report of examination, knows and understands the content of the report.

**X Approval:** The Grant County Water Conservancy Board hereby **grants** conditional approval for the water right transfer described and conditioned within the report of examination on November 27, 2013 and submits this record of decision and report of examination to the Department of Ecology for final review.

☐ **Denial:** The Grant County Water Conservancy Board hereby **denies** conditional approval for the water right transfer as described within the report of examination on November 27, 2013 and submits this record of decision to the Department of Ecology for final review.

DESCRIPTION OF PROPOSED WORKS

Isaak Land plans to irrigate 63.37 acres within the E1/2 NW1/4 of Section 35, Township 25 North, Range 28 East, W.M., Excepting therefrom the 150 foot right of way conveyed to the State of Washington for Primary State Highway #2 by deed recorded June 2, 1949, under Auditor's File No. 145875, Grant County, Washington; 30.84 acres lying in the S1/2 of Section 17, Township 25 North, Range 30 East, W.M., Grant County Washington, lying within parcel numbers 171589001, 181827000, 181827010 and 181827001.

The acres that will be irrigated in Section 35 will utilize waters from five existing wells and pump systems. This acreage will be irrigated as part of a larger integrated system. A portion of an existing part circle will be utilized to irrigate the 63.37 acres. The acres that will be irrigated in Section 17 will utilize waters from four existing wells and pump systems. This acreage will be irrigated as part of a larger integrated system. This acreage will be irrigated utilizing center pivots that will be installed or expanded in the future. The required pipelines will be installed as needed.

The applicant is not expanding the currently authorized Qi and Qa. The added points of withdrawal (wells) will service the existing and additional places of use without any changes to the total amount of water withdrawn.

REPORT

BACKGROUND [See WAC 173-153-130(6)(a)]

On June 27, 2013, Isaak Land Inc. of Coulee City, Washington filed an Application for Change/Transfer to change and add points of withdrawal, and add place of use under this certificate with the Grant County Water Conservancy Board (Board). The application was accepted at an open public meeting on June 27, 2013, and the Board assigned application number GRAN-13-02. The Washington State Department of Ecology (Department) assigned WRATS number CG-\*02753C@1 to this change request.

Isaak Land Inc., owns Ground Water Certificate 2283-A with a priority date of October 14, 1952, which authorizes the right to develop a system to withdraw water from one (5) wells in the amount of 800 gpm, 320 acre-feet per year for the irrigation of 80 acres. The applicant has applied to change the place of use and change and add points of withdrawal under the certificate.

The applicant requests to add four points of withdrawal to the existing points of withdrawal under this certificate. The locations of the proposed points of withdrawal are:

- Well #1, 1380 feet north and 650 feet west from the SE corner of Section 26, Township 25 North, Range 28 East, WM, Grant County, Washington; being within the NE1/4 SE1/4 of said Section 26; lying within parcel number 171560000.
- Well #2, 900 feet north and 30 feet west from the S1/4 corner of Section 26, Township 25 North, Range 28 East, WM, Grant County, Washington; being within the SE1/4 SW1/4 of said Section 26; lying within parcel number 171554000.
- Well #3, 1300 feet north and 660 feet west from the E1/4 corner of Section 26, Township 25 North, Range 28 East, WM, Grant County, Washington; being within the SE1/4 NE1/4 of said Section 26; lying within parcel number 171549001.

Well #4, 1300 feet north and 60 feet west from the center of Section 35, Township 25 North, Range 28 East, WM, Grant County, Washington; being within the SE1/4 NW1/4 of said Section 35; lying within parcel number 171589001.  
Well #5, 250 feet south and 1200 feet east from the N1/4 corner of Section 35, Township 25 North, Range 28 East, WM, Grant County, Washington; being within the NE1/4NW1/4NE1/4 of said Section 35; lying within parcel number 171588001.  
Well #6, S1/2S1/2 Section 16, Township 25 North, Range 30 East, W.M., Grant County, Washington; lying within parcel numbers 181822001 & 181823000.  
Well #7, S1/2 S1/2 Section 16, Township 25 North, Range 30 East, WM, Grant, County, Washington; lying with parcel numbers 181822001 & 181823000.  
Well #8, 340 feet south and 600 feet east from the center of Section 16, Township 25 North, Range 30 East, WM; being within the NW1/4 SE1/4 of said Section 16, Grant County, Washington; lying within parcel number 181822001.  
Well #9, SW1/4NE1/4 Section 16, Township 25 North, Range 30 East, WM, Grant County, Washington; lying within parcel number 181822001.  
All lying within WRIA 42.

The applicant requests changes to the place of use.

The existing certificated place of use is: 80 acres within the E1/2 NW1/4 of Section 35, Township 25 North, Range 28 East, W.M., Excepting therefrom the 150 foot right of way conveyed to the State of Washington for Primary State Highway #2 by deed recorded June 2, 1949, under Auditor's File No. 145875, Grant County, Washington. Lying within parcel number 1589001. All lying within WRIA 42.

The locations of the proposed places of use are: 63.37 acres within the E1/2 NW1/4 of Section 35, Township 25 North, Range 28 East, W.M., Excepting therefrom the 150 foot right of way conveyed to the State of Washington for Primary State Highway #2 by deed recorded June 2, 1949, under Auditor's File No. 145875, Grant County, Washington. 30.84 acres lying in the S1/2 of Section 17, Township 25 North, Range 30 East, W.M., Grant County Washington. Lying within parcel numbers; 171589001, 181827000, 181827010, and 181827001. All lying within WRIA 42.

Isaak Land Inc. owns groundwater certificates 221-A, 2283-A, 2482-A, 2769-A, 5492-A, 2802-A, G3-00884C(B), G3-22021C, 1476-A, G3-01539C and G3-01352C(C). Similar applications to this one are being processed for certificates 221-A, 2482-A, 2769-A and 5492-A. The intent of this change is to integrate these water rights, so that a common system with common points of withdrawal can be utilized to serve the irrigated acreage. The result of this change will be to have nine common points of withdrawal. The total combined quantities under these 11 water rights, based upon the current and previous changes would not exceed the following: 6413.9 gpm, 3925.06 acre-feet, 936.03 acres primary and 628.5 acres supplemental. Additionally there is 10 gpm and 2 acre-feet designated for domestic and stock-water supply.

*Attributes of the water right as currently documented*

Name on certificate, claim, permit: Philip J. Buob

Water right document number: 2283-A

As modified by certificate of change number: NA

Priority date, first use: Priority Date October 14, 1952

Water quantities: Qi: 800 gpm Qa: 320 acre ft./ year

Source: 5 wells yielding from the Wanapum/Grand Ronde Aquifer System

Point of diversion/withdrawal: Well #1, 1230 feet north and 40 feet east from the SW corner of Section 26, Township 25 North, Range 25 East, WM, Grant County, Washington; being within the SW1/4SW1/4 of said Section 26; lying within parcel number 171571000. Well #2, 1210 feet north and 1220 feet east from the SW corner of Section 26, Township 25 North, Range 25 East, WM, Grant County, Washington; being within the SW1/4SW1/4 of said Section 26; lying within parcel number 171571000. Well #3, 900 feet north and 30 feet west from the S1/4 corner of Section 26, Township 25 North, Range 25 East, WM, Grant County, Washington; being within the SE1/4SW1/4 of said Section 26; lying within parcel number 171554000. Well #4, 1300 feet north and 660 feet west from the E1/4 corner of Section 26, Township 25 North, Range 25 East, WM, Grant County, Washington; being within the SE1/4NE1/4 of said Section 26; lying within parcel number 171549001. Well #5, 1300 feet north and 60 feet west from the center of Section 35, Township 25 North, Range 25 East, WM, Grant County, Washington; being within the SE1/4NW1/4 of said Section 35; lying within parcel number 171589001.  
All lying within WRIA 42.

Purpose of use: Irrigation – 80 Acres

Period of use: Seasonal

Place of use: 80 acres within the E1/2 NW1/4 of Section 35, Township 25 North, Range 28 East, W.M., Excepting therefrom the 150 foot right of way conveyed to the State of Washington for Primary State Highway #2 by deed recorded June 2, 1949, under Auditor's File No. 145875, Grant County, Washington; lying within parcel number 171589001. All lying within WRIA 42.

Existing provisions: See Existing Certificate

*Tentative determination of the water right*

The tentative determination is provided on the front page of this report.

History of water use

This water right was issued in 1952 and has been continuously utilized in the irrigation of crops since that time.

With the use of center pivot irrigation the entire authorized acreage has not been irrigated during the most recent 5 year cropping history. Portions of a single part circle serves the existing place of use. The following is a breakdown of the acreages irrigated as determined by FSA, and the crops grown over that most recent 5 year period:

Circle	2008 Crops/acres	2009 Crops/acres	2010 Crops/acres	2011 Crops/acres	2012 Crops/acres
62	Grass/63.37	Grass/63.37	Wheat/63.37	Alfalfa/63.37	Alfalfa/63.37
CRP	Grass/.90 prior to CRP				

Previous changes

A Superseding Certificate was issued in February, 1999 that integrated several water rights and their points of withdrawal.

SEPA

The Board has reviewed the proposed project. This project is not subject to SEPA as the threshold set for changes to groundwater withdrawals has not been met.

The information or conclusions in this section were authored and/or developed by Thomas R. Buchholtz PE.

COMMENT AND PROTESTS [See WAC 173-153-130(6)(b)]

Public notice of the application was given in the Coulee City News-Standard on September 4, 2013 and September 11, 2013. The protest period ended on October 12, 2013. There was a protest received from the Fordair Water Cooperative. No oral or written comments were received at an open public meeting of the Board or other means as designated by the Board.

This application for change was distributed to the Eastern Washington Council of Governments, the Washington State Department of Fish and Wildlife, and the Washington State Department of Archaeology and Historic Preservation on August 28, 2013 by email.

No comments have been received.

The information or conclusions in this section were authored and/or developed by Thomas R. Buchholtz PE.

INVESTIGATION [See WAC 173-153-130(6)(c)]

The following information was obtained from a site inspection conducted by members of the Board, and the applicant on November 17, 2013 technical reports, research of Department records, and conversations with the applicant and/or other interested parties.

Proposed project plans and specifications

The acreage currently being irrigated under this water right is being served by 5 wells and a portion of 1 part circle. The wells are described in the Well Description Report Attachment. The wells are located as noted previously.

It is the intention of the right holder to continue to utilize the existing part circle to irrigate the existing 63.37 acres located in Section 35. The system will be modified so that this parcel can be integrated into a larger project managed by the right holder. Five existing wells will be utilized along with the associated pumps and pipelines to serve this parcel. New pipelines may be required to tie all the wells together. 30.84 acres located in Section 17 will utilize proposed center pivots to irrigate those acres. The specific orientation of those pivots has not been finalized. Four existing wells will be utilized along with the associated pumps and pipelines to serve this parcel. New pipelines will be required to serve the future center pivots. The breakdown of the pumps located at the individual wells is as follows:

- Well 1 – 75 horsepower turbine
- Well 2 – 100 horsepower turbine
- Well 3 - 150 horsepower turbine
- Well 4 – 100 horsepower turbine and 30 horsepower centrifugal booster
- Well 5 – 100 horsepower submersible
- Well 6 – 600 horsepower turbine and 150 horsepower centrifugal booster
- Well 7 – 400 horsepower turbine and 60 horsepower centrifugal booster
- Well 8 – 75 horsepower turbine and 30 horsepower centrifugal booster
- Well 9 - 750 horsepower turbine

The wells, pumps, center pivots and pipelines will be maintained and upgraded in the future to optimize irrigation efficiency.

Isaak Land Inc. owns groundwater certificates 221-A, 2283-A, 2482-A, 2769-A, 5492-A, 2802-A, G3-00884C(B), G3-22021C, 1476-A, G3-01539C and G3-01352C(C). Similar applications to this one are being processed for certificates 221-A, 2482-A, 2769-A and 5492-A. The intent of this change is to integrate these water rights, so that a common system with common points of withdrawal can be utilized to serve the irrigated acreage. The result of this change will be to have nine common points of withdrawal. The total combined quantities under these 11 water rights, based upon the current and previous changes would not exceed the following: 6413.9 gpm, 3925.06 acre-feet, 936.03 acres primary and 628.5 acres supplemental. Additionally there is 10 gpm and 2 acre-feet designated for domestic and stock-water supply.

*Public Interest (groundwater only)*

The proposed transfer is subject to RCW 90.44.100 and therefore, cannot be detrimental to the public interest, including impacts on any watershed planning activities.

A recent Washington State Supreme Court ruling has stated that "...a 'public interest' test is not a proper consideration when Ecology acts on a change application under RCW 90.03.380." PUD No. 1 of Pend Oreille County v. Dep't of Ecology, 70372-8 (2002). By extension, neither does the Board have authority to apply a public interest test when evaluating a change in water right request under RCW 90.03.380. Previous legal review has indicated that the above court case is in reference to surface water changes/transfers, and groundwater-serviced water right changes/transfers are subject to public interest consideration under the purview and scope of the groundwater code. The Board concludes that the requested change/transfer is not contrary to the public interest governing water use. To the extent review of public interest is applicable, the Board finds that the application for change is consistent with public policy objectives of the state to provide for efficient use of water resources, to encourage supply of new or expanding uses through change/transfer of existing water rights, to provide greater operational control to water managers, and to ensure no impairment exists.

Because the proposed action will not increase the existing permitted water use, or increase the water put to actual beneficial use, or result in a measurable impact on other existing water rights or applications for new water rights, it does not change the existing status quo for water use impacts. Thus, no impairment is perceived, because of the change/transfer requested in the application. Water use is provided consistent with statutory requirements for beneficial use.

The proposed action does provide for a continuation of the existing beneficial use as stated within the permit of water right, increasing the economic benefits to the state and local area by allowing for continued use and development of irrigated lands. The development is taking place in the land-use management area of Grant County.

This action is consistent with the intent of RCW 90.03.380, 90.44.100, and 90.80 (amended May 10, 2001) and other applicable statutes; and it is consistent with Grant County's Comprehensive Land-Use Plan. No impairment is consistent with the public interest; all pertinent water right issues are addressed above; conditions are recommended within this ROE to further protect the public interest consistent with state water law.

The application for change/transfer is consistent with the public interest requirements for beneficial water use, and consistent with the procedural, technical, and legal review requirements by the state.

*Tentative Determination*

In order to make a water right change decision, the Board must make a tentative determination on the validity and extent of the right. The Board has made the tentative determination as displayed upon the first page of this report. Water right documents attempt to define a maximum limitation to a water right, rather than the actual extent to which a water right has been developed and maintained through historic beneficial use. Additionally, except for a sufficient cause pursuant to RCW 90.14.140, water rights, in whole or in part, not put to a beneficial use for five consecutive years since 1967 may be subject to relinquishment under Chapter 90.14.130 through 90.14.180 RCW. Water rights may additionally be lost through abandonment. The Board's tentative determination was based upon the following findings:

The water right applicant holds a valid water right in good standing, and it is on file with the Department. The Board confirms that the water right is being used subject to the existing certificate provisions.

The certificate is valid as stands, subject to subsequent change actions by the Board and any Department administrative changes affecting development.

Under the change request, the total amount of water withdrawal from the existing source cannot exceed the amount within the certificated water right. The change/transfer request must not exceed the existing water right limits; no enlargement of the water right is allowed.

The change/transfer request must be consistent with RCW 90.03.380, and related water code statutes. The required annual consumptive quantity (beneficial use) analysis indicates the following:

- This water right has been certificated, and is in good standing.
- The water under this certificate is being beneficially utilized for the irrigation of crops. Continued beneficial use will be completed based upon the development schedule outlined in the "Board Decision" above.
- The Board has determined that the full amount of the said water right available for change/transfer is presented within the above "Board Decision" summary, and should be the amount not exceeded by the applicant within the proof of appropriation filing and within the final certificate issued by the Department. The applicant's request for a change is allowed under the water code and case law.

Based on detailed technical review of the applicant’s submittal, it is concluded that the requested change/transfer will withdraw water from the same body of water (and management area) as that allowed under the existing water right—and per applicant discussions with Department staff.

The added change cannot create impairment. The Board has reviewed the applicant’s technical information on potential impairment, and concludes that impairment is not an issue for the water right change/transfer see the Impairment Analysis 221-A, 2283-A, 2482-A, 2769-A, 5492-A Attachment.

It is noted and concluded from existing WA State water law, Department water right data, the applicant’s technical information (impairment analysis attached), and previous discussions with Department staff, that:

- 1) Impairment means that other water right holders are unable to use their water rights (whole or in part), given reasonable pumping lift with the construction of qualifying diversion works.
- 2) For this immediate area, no record/affirmation of impairment has been noted by the Board or Department.
- 3) The Department staff has not raised any impairment issues.
- 4) The Board has required the applicant to consider impairment issues for the applicant’s change request, including technical consultations with the Board. There is no indication that the change action will impair other water rights. The Board has attached the formal impairment analysis prepared by a qualified professional engineer.
- 5) Based on the public notice of this change request, the Board has received one impairment issue protest from other existing water right holders, including those who withdraw water from sites close to the applicant’s proposed well sites. A protest letter from Fordair Water Cooperative was received with concerns of potential impairment.

The Board concludes that the proposed action will not create impairment to other water rights per the provisions and conditions established under the existing permit/change order and the conditions provided within this ROE/ROD; impairment is not an issue for the specific action related to this water right change.

Annual Consumptive Quantity (ACQ)

The following ACQ analysis was run to determine what water has been put to beneficial use, and what water and associated acreage is available to be transferred and spread as per state statute:

For this determination the Washington Irrigation Guide (WIG) will be utilized to determine the Crop Irrigation Requirement (CIR), along with an irrigation efficiency of 90%. The result of the average of the two highest annual ACQs over the last 5 years will be compared to the 30” annual requirement that will be utilized in the future to determine water available to be spread. Wilson Creek WIG information will be utilized as the closest data source to the project. The previously noted crop history will be utilized in this analysis.

Circle	2008 Crops/ acres	2009 Crops/ acres	2010 Crops/ acres	2011 Crops/ acres	2012 Crops/ acres
62	Grass/63.37	Grass/63.37	Wheat/63.37	Alfalfa/63.37	Alfalfa/63.37
CRP	Grass/.90 prior to CRP				

Circle 62      Grass CIR = 39.58”      Wheat CIR = 25.90”      Alfalfa CIR = 37.46”

For crop years 2008 and 2009 the TIR would be:  
63.37X39.58/.9/12=232.24 ac-ft

For crop year 2010 the TIR would be:  
63.37X25.90/.9/12=151.97 ac-ft

For crop years 2011 and 2012 the TIR would be:  
63.37X37.46/.9/12=219.80 ac-ft

CRP      Prior To CRP in Grass TIR would be:  
.9X39.58/.9/12=3.30 ac-ft

The two highest water duty years are therefore 2008 and 2009, and the associated ACQs result in the following 2 year average:

Average – (232.24+232.24)/2 + (3.30+3.30)/2=235.54 ac-ft

Certificated for 320 ac-ft, therefore the use has been less than the certificated amount

Total Acreage Currently Irrigated – 63.37 acres

Certificated for 80 acres, therefore currently irrigating less than the certificated acreage

Water required at 2.5’/Acre – 2.5 X 63.37 = 158.43 ac-ft

Water available for spreading – 235.54-158.43 = 77.11 ac-ft

Spreadable acres based on water savings –  $77.11/2.5 = 30.84$  acres

Grand Total gpm – 800

Grand Total ac-ft – 235.54

Grand Total acres – 94.21

Reduction in ac-ft – 84.46

The information or conclusions in this section were authored and/or developed by Thomas R. Buchholtz PE.

## CONCLUSIONS [See WAC 173-153-130(6)(d)]

*Tentative determination (validity and extent of the right)*

The certificate of water right is verified and in good standing per Department records.

*Relinquishment or abandonment concerns:* After performing the ACQ test under this application it has been determined that there will be an increase of 30.84 acres based on water spreading and a relinquishment of 84.46 acre-feet associated with this application.

*Hydraulic analysis*

Based on detailed technical review of the applicant's submittal, it is concluded that the requested change/transfer will withdraw water from the same body of water (and management area) as that allowed under the existing water right—and per recent applicant discussion with Department staff.

The added change cannot create impairment. The Board has reviewed the applicant's technical information on potential impairment, and concludes that impairment is not an issue for the water right change/transfer (see attachment – Impairment Analysis).

It is noted and concluded from existing WA State water law, Department water right data, the applicant's technical information (impairment analysis attached), and previous discussions with Department staff, that:

- 1) Impairment means that other water right holders are unable to use their water rights (whole or in part), given reasonable pumping lift with the construction of qualifying diversion works.
- 2) For this immediate area, no record/affirmation of impairment has been noted by the Board or Department.
- 3) Department staff has not raised any impairment issues.
- 4) The Board has required the applicant to consider impairment issues for the applicant's change request, including technical consultations with the Board. There is no indication that the change action will impair other water rights. The Board has attached the formal impairment analysis prepared by a qualified professional engineer.
- 5) Based on the public notice of this change request, the Board has received one impairment issue protest from other existing water right holders, including those who withdraw water from sites close to the applicant's proposed well sites. A protest letter from Fordair Water Cooperative was received with concerns of potential impairment.

The Board concludes that the proposed action will not create impairment to other water rights per the provisions and conditions established under the existing permit/change order and the conditions provided within this ROE/ROD; impairment is not an issue for the specific action related to this water right change.

*Consideration of comments and protests*

A protest was received from the Fordair Water Cooperative. The protest was based on a concern that the additional points of withdrawal proposed by Isaak Land would impact their existing wells. In reviewing this concern the proposed change should not cause any additional impact to their existing wells. There will be no actual new points of withdrawal constructed as a result of this change. Existing wells will be tied together to irrigate existing center pivots more efficiently. Under this change the annual volume authorized to be pumped will actually be reduced, and a portion of that volume is being relocated to new irrigated property several miles east of the Fordair Water Cooperative wells. Wells in that area will be utilized to irrigate those acres. Given these factors this change will cause no significant impact to the Fordair Water Cooperative's wells.

The Fordair Water Cooperative also discussed a concern that the change may lead to additional nitrate impacts on their wells. No new ground in close proximity to those wells will be developed under this change proposal, and this change proposal deals with the water rights only and not farming practices. As such this issue is not a subject to be reviewed under this change proposal.

*Impairment*

There will be no impairment of existing water rights or the holder of those rights associated with this change. See Impairment Analysis 221-A, 2283-A, 2482-A, 2769-A, 5492-A Attachment.

The Board concludes that the requested change/transfer is not contrary to the public interest governing water use. To the extent review of public interest is applicable, the Board finds that the application for change is consistent with public policy objectives of the state to provide for efficient use of water resources, to encourage supply of new or expanding uses through change/transfer of existing water rights, to provide greater operational control to water managers, and to ensure no impairment exists.

*Annual Consumptive Quantity (ACQ)*

When the last 5 years of history has been reviewed the 800 gpm instantaneous rate has been affirmed. The annual acre-footage has been reduced to 235.54 acre-feet, and the acreage available to be irrigated at 2.5 acre-feet per year per acre has been increased to 94.21 acres.

*Other*

The board also considered the previous provisions associated with the water right as identified in the background section of this report when making its decision.

**DECISION** [See WAC 173-153-130(6)(e)]

The Grant County Water Conservancy Board hereby **RECOMMENDS APPROVAL** of the water right change/transfer described within this Record of Examination and Record of Decision as summarized in the Board Decision section of this report, and submits this report for conditional approval to the Director of the Washington State Department of Ecology.

The information or conclusions in this section were authored and/or developed by Thomas R. Buchholtz PE.

**PROVISIONS** [See WAC 173-153-130(6)(f)]

*Conditions and limitations*

The applicant's water right change is conditioned by all provisions of the existing 2283-A certificate. These include and are not limited to:

- The total withdrawal under Certificates G3-00884C(B), 2802-A, G3-22021C, 221-A, 2482-A, 5492-A, 2283-A, 2769-A, 1476-A, G3-01539C and G3-01352C(C) shall not exceed 6413.9 gpm, 3925.06 acre-feet annually for the irrigation of a total of 3925.06 primary acres, and 628.5 supplemental acres along with 10 gpm and 2 acre-feet annually for domestic and stock-water supply.
- An approved measuring device shall be installed and maintained for each of the sources identified herein in accordance with the rule "Requirements for Measuring and Reporting Water Use", Chapter 173-173 WAC. Water use data shall be recorded weekly and maintained by the property owner for a minimum of five years, and shall be promptly submitted to Ecology upon request.
- Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the records of water use that are kept to meet the above conditions, and to inspect at reasonable times any measuring device used to meet the above conditions.
- The amount of water granted is a maximum limit that shall not be exceeded and the water user shall be entitled only to that amount of water within the specified limit that is beneficially used and required for actual crop growth on the number of acres and place of use specified.
- A superseding certificate of water right will not be issued until a final examination is made.
- The water quantities and uses recommended and/or the number of acres to be irrigated may be reduced at the time of issuance of a final water right commensurate with the capacity of the installed system and the uses and/or the number of acres actually irrigated.
- Nothing in this authorization shall be construed as satisfying other applicable federal, state, or local statutes.
- All wells constructed within the State shall meet the minimum standards for construction and maintenance as provided under RCW 18.104 and Chapter 173-160 WAC.
- Use of water under this authorization shall be contingent upon the water right holder's utilization of up to date water conservation practices and maintenance of efficient water delivery systems consistent with established regulation.
- This authorization to make use of public waters of the state is subject to existing rights, including any existing rights held by the United States for the benefit of Indians under treaty or otherwise.

*Construction Schedule*

The Applicant will begin the work required to fulfill the requirements of this change by January 1, 2015. Work will be completed to fulfill the requirements of this change by January 1, 2017. The water authorized under this change shall be put to full beneficial use by January 1, 2018.

The information or conclusions in this section were authored and/or developed by Thomas R. Buchholtz PE.

The undersigned Board Commissioner certifies that he/she understands the Board is responsible "to ensure that all relevant issues identified during its evaluation of the application, or which are raised by any commenting party during the Board's evaluation process, are thoroughly evaluated and discussed in the board's deliberations. These discussions must be fully documented in the report of examination." [WAC 173-153-130(5)] The undersigned therefore, certifies that he/she, having reviewed the report of examination, knows and understands the content of this report and concurs with the report's conclusions.

Signed at Moses Lake, Washington  
This 27th day of November, 2013

---

W. Ron Baker, Commissioner  
Grant County Water Conservancy Board
